

## **HSCRC-regulated Substance Abuse Treatment Model Redesign**

### **Continued Stay Criteria**

**An individual must meet all of the continued stay criteria at every 90 day review to qualify for continuation of care in an HSCRC-regulated substance abuse treatment program.**

**The individual continues to voluntarily agree to receive services in an HSCRC-regulated substance abuse treatment program.**

**A.** Admission medical necessity criteria continue to be met despite treatment efforts, or additional conditions consistent with the medical necessity criteria emerge.

**B.** There is documented evidence that the individual either:

- a. Has had limited or no progress toward goals which is being addressed in changes to the treatment plan and interventions.

**OR**

- b. Progress toward goals has been made but there is documented evidence that the individual is at risk for relapse to significant biopsychosocial problems due to the tenuous nature of clinical or functional gains.

**OR**

- c. Care is concentrated in the hospital system such that fragmentation of care would be detrimental to the individual's overall health or ability to achieve stability in recovery.
